

Art Lesson “Sports Holiday” for 6-7 years old

Tasks:

1. Developing child observation and the ability to recreate their impressions of the sporting day of the kindergarten.
2. Developing a sense of composition.
3. Get used to collective activity.

Warm- up

The teacher conducts a brief but emotional conversation with the children about the sporting holiday of kindergarten. Reminds them of their observation and experiences with bicycles.

Posting the lesson’s topic

The teacher communicates the topic of upcoming work. Children can choose what material to work with in the studios: modeling, painting with markers, pastel painting, tempera paints...

Workshops

According to what the children choose, they work in separate workshops. In order not to disturb the integrity of the artistic image and the esthetic experience of the children, each of them creates a separate element.

As a result of the general discussions, children arrange the elements. Some make bicycle wheels, others make pedals, others - seats... Other children take care of the work landscape... And all this with music background.

Evaluation of the work and arrangement of the exhibition

A representative of each group explains the work of the group. The teacher encourages the children and emphasizes the common achievements, with the task being judged.
