

Mini project “A map with marked dangers on the way to our Kindergarten”

Project 2018-1-PL01-KA229-050669_3
“Chain reaction”

Parents of children
from preparatory school groups
organized an initiative
to tour the kindergarten area.

As a result,
they identified dangerous points in the area
- for cyclists and for pedestrians.

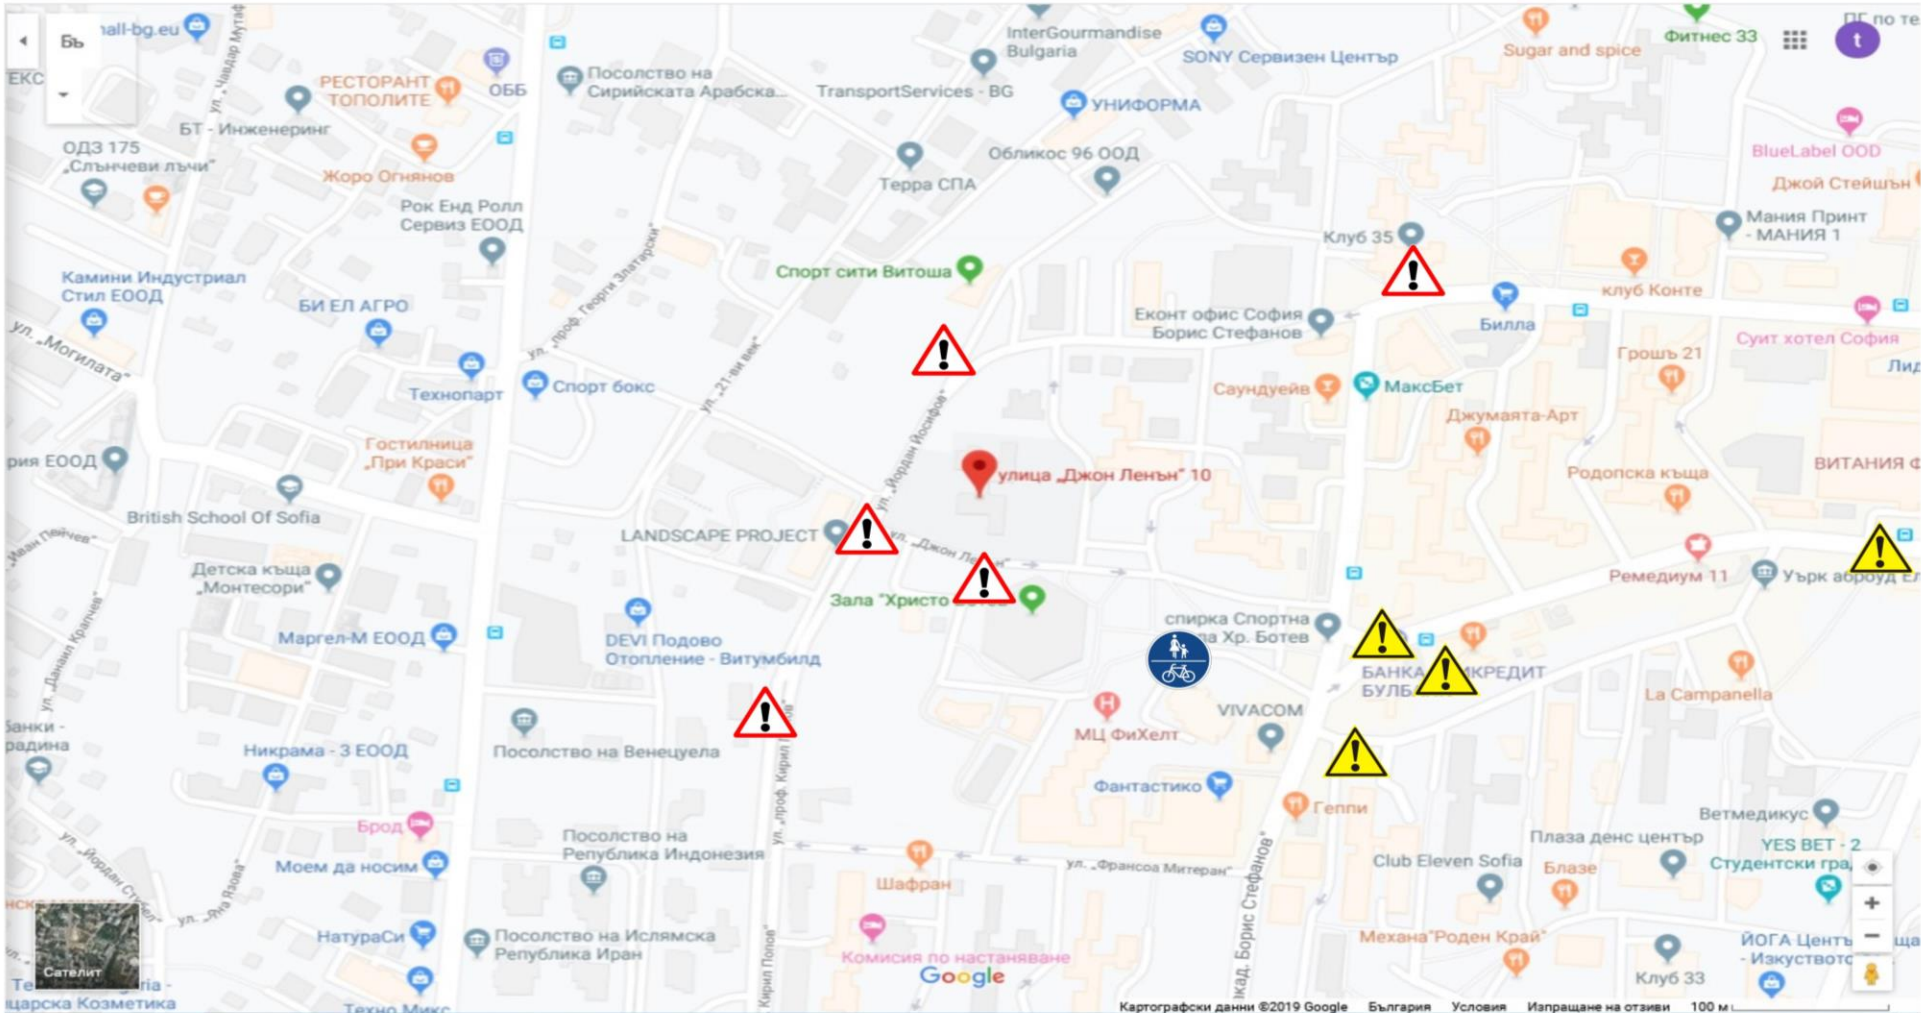

Then parents and teachers worked together to create a map of designated danger points in the Kindergarten area.

A map with marked dangers on the way to our Kindergarten

They created this map. The yellow exclamation mark indicates the danger points covered by signs, markings and traffic lights. The red signs indicate intersections without a pedestrian path. The circular blue sign indicates a place suitable for walking and cycling.
