

## Activity report

On 18<sup>th</sup> June 2021 our school organized the activity called “**Put the helmet on!**”, as part as the Erasmus project **Chain Reaction**, with class 3C.

The aim of the activity was to make students aware of the importance of wearing safety equipment, especially the helmet, when riding the bike. The activity started with a discussion about the fact that people don't understand how serious injuries can be when they fall off their bike and that the simple gesture of putting on the helmet can save lives.

Then the pupils were invited to watch short clips in English on YouTube on the subject and understand them with the help of the English teacher:

The activity ended with pupils thinking of inspiring messages in English, writing them and colouring in pictures of all sorts of helmets in order to convince colleagues and friends to “set a good example”, “put the helmet on”, because “it can save your life!”
